# About Us

Ganen is a distributor of innovative home automation products. Our products are designed and specially curated to provide your homes and your families with a perfect level of efficiency, comfort and peace of mind.

We specialise in smart home and internet-enabled appliances that would bring you the comfort and efficiency that you deserve. Reliability and innovation goes together which is why our products are time-tested. With our products, you can make your home a true safe haven.

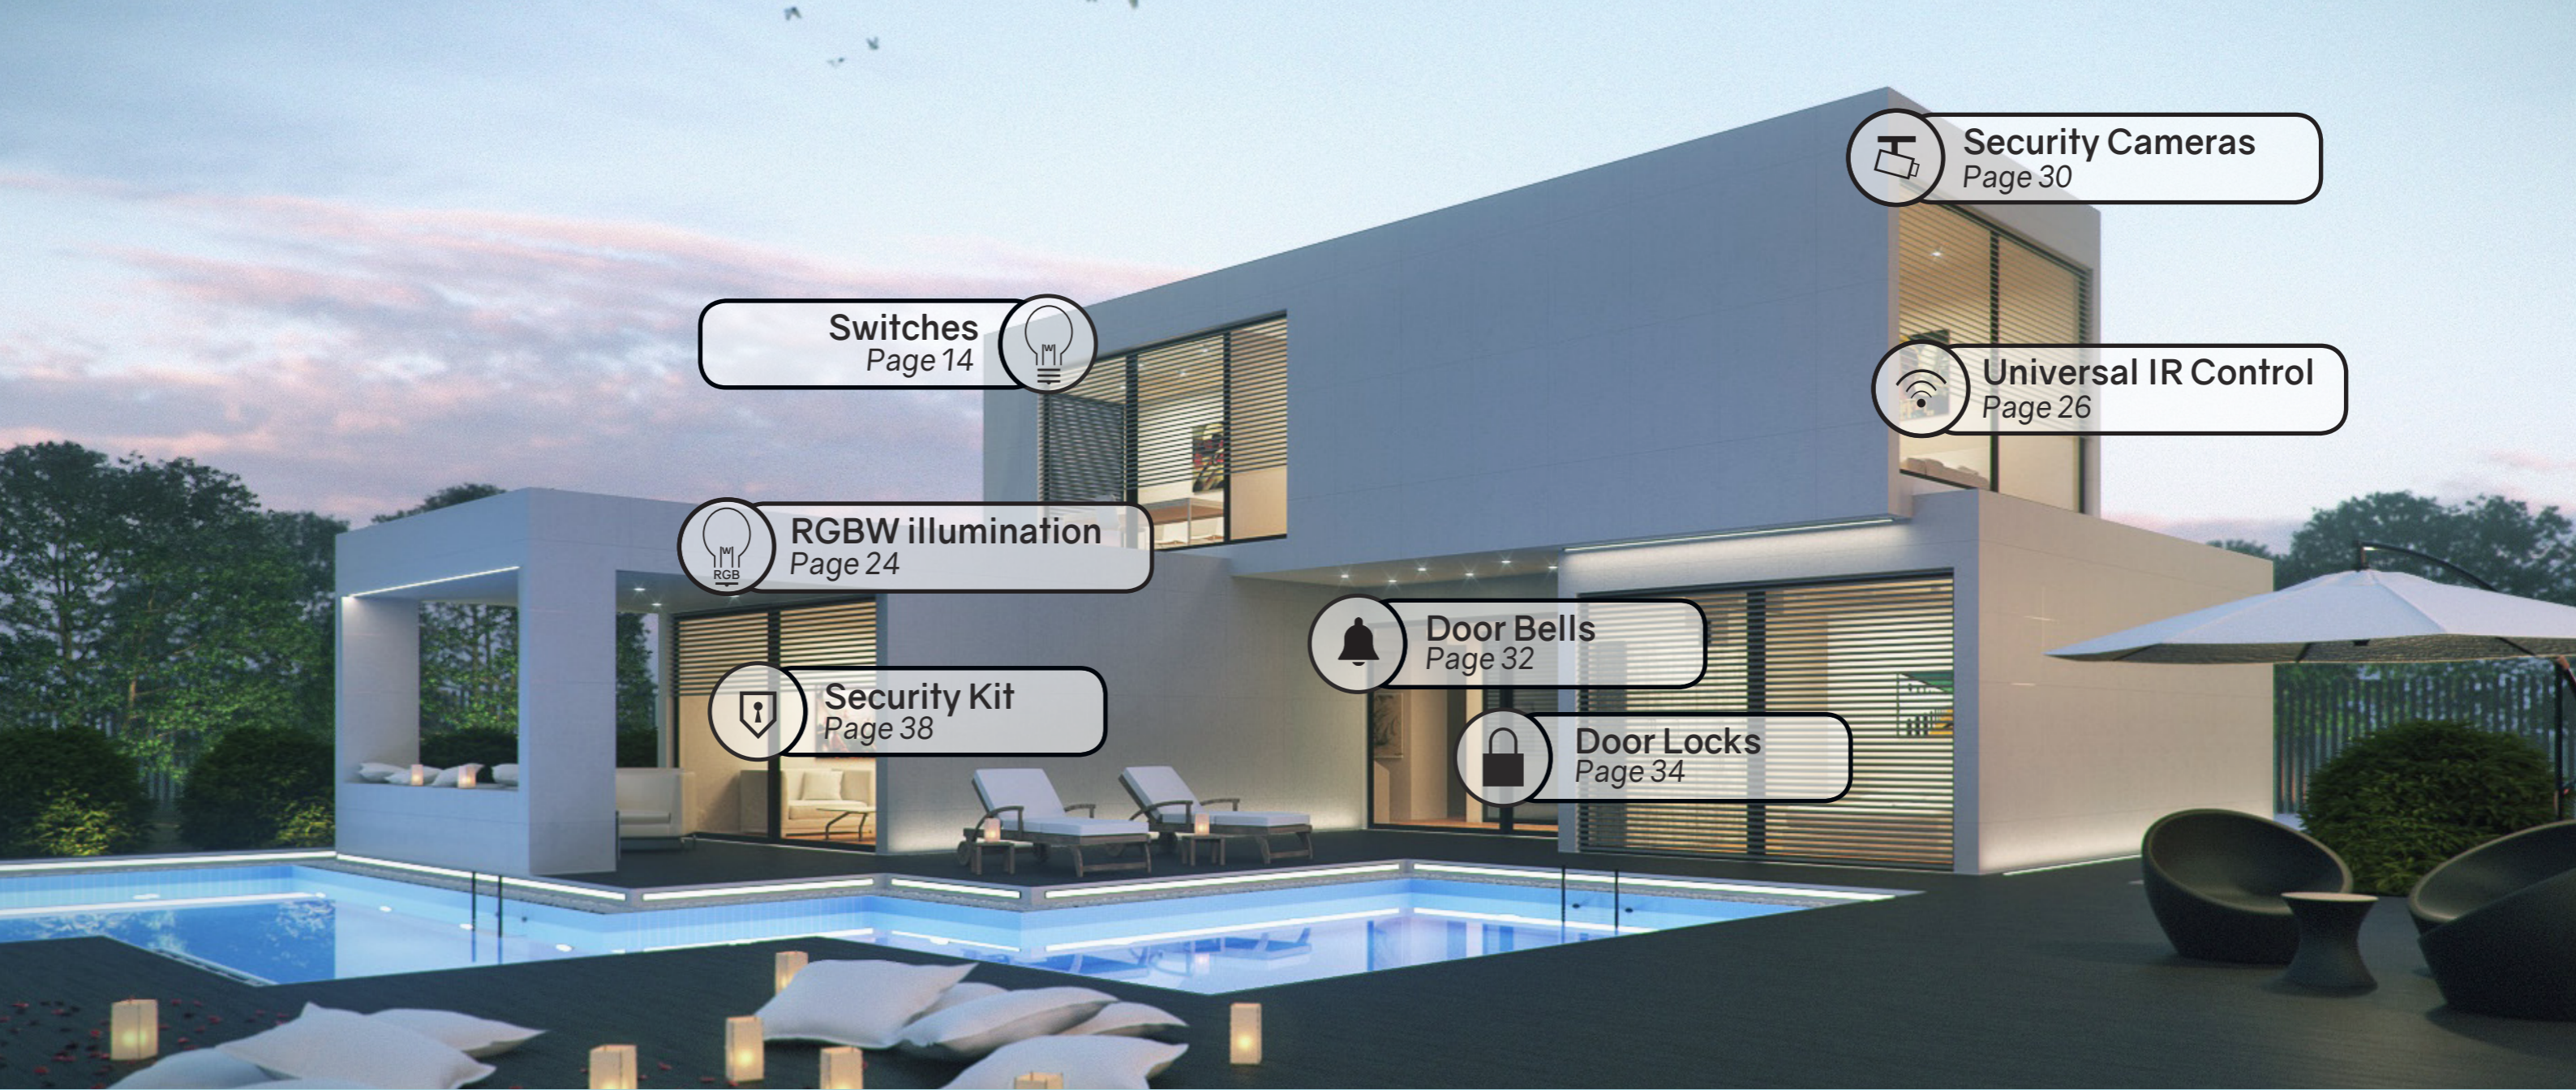

We believe that when you spend less time worrying about mundane things about your home such as construction and electricity bills, you spend more time with your loved ones in your elegant and personally transformed home.

We hope that our products bring you joy from the moment you say "I'm home."

**Key Fob Switch**  
KK1100

The wireless and batteryless KAES Kinetic Key Fob is extremely portable and is small enough to be hung on a key ring. It can be incredibly useful in our day-to-day lives and can control up to a distance of 80m outdoors (unblock) and 20m indoors.

This micro device works just like all our kinetic switches!

**5A WiFi Controller  
(non-dimmable controller)  
KRC309**

Wireless receiving controller that pairs with our KAES Kinetic Switches. Reliably supports diverse power loads with anti-surge and short circuit protection.

**1A WiFi Controller  
(dimmable controller)  
KRC310**

Wireless receiving controller that supports dimmable luminaires. Offers a “dim on” and “dim off” function that brings soft lighting to another level.

**WiFi Socket Adapter  
KRC502**

Easily and remotely manage your home appliances with our socket adapter. It can also be paired with our KAES Kinetic Wireless Switches, and can be used to control hanging lamps, kettles, and standing fans etc.

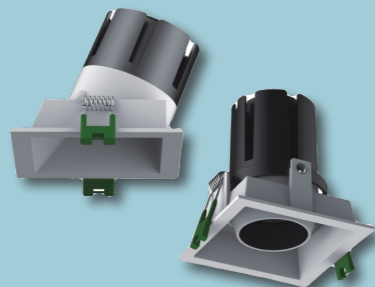

Make any appliance smart!

## Digital Door Lock

One step closer to unlocking your doors with keys. Our stylish and ergonomic digital door locks, with state-of-the-art fingerprint recognition solution and our patented security technology, rest assured that your home is secured in safe hands. Your security is our priority.

Ever forgotten to lock the door? Now you can check the status of your door lock anywhere and remotely control it from our app. Send a temporary one time password, or remotely unlock it for a friend/family anywhere from your phone.

## Digital Thumbprint Door Lock (Curved) GE202

Smart controls over a centralised network, making management easier for multiple users. Compatible with 4 pieces of AA batteries which boasts a low power consumption and power saving technology. It will also notify you when the batteries are running low and a USB emergency port allows you open door when the batteries are flat. This lock can be installed on doors between 4cm-10cm thick.

A hostile or forced entry will trigger the system to automatically sound a siren and notify you of the intrusion.

## Siren Hub

HD-R01

A seamless wireless technology to make your home safe.

- On-site high decibel alarm
- Flashing lights with customisable alarm modes
- Low-battery detection
- Anti-tamper

## Key Fob

HD-S104

With this key fob, you are able to arm/disarm your home when you arrive/leave your home. Alternatively, you can also do it from our app.

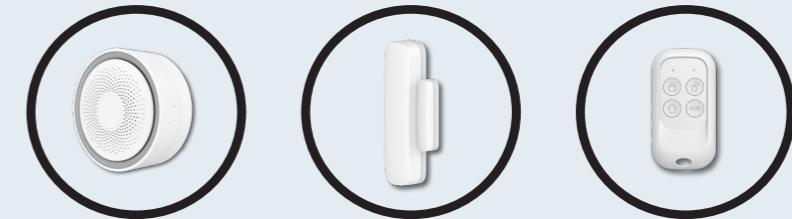

## Door/Window Motion Sensor

HD-P01

A combination of PIR motion detector and door/window sensor. 2 key security functions in one device. Highly sensitive with a low false detection rate.

## Appliances available as a set

## SECURITY KIT

Whether you have a big villa home or a small studio apartment, our security kit has all the security functions you need to keep you and your family safe. Equipped with a WiFi technology, it is wireless and extremely reliable.

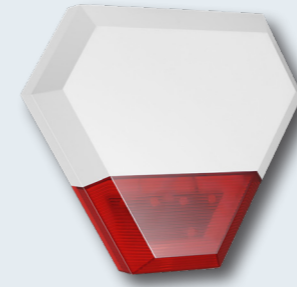

## Smoke Detector

HD-201

A smoke detector is an important safety tool because they increase your chance of escaping from a home fire. Not only does our smoke detector protect you and your loved ones, it also embodies an elegant and stylish addition that would blend in with any room.

## Strobe Siren

HD-901

Our outdoor strobe siren has an extremely loud decibel siren and emits a bright flashing alert when triggered.

Our Strobe Siren is compatible with our Siren Hub.

## Motion Sensor

HD-600

When the motion sensor is tripped, it sends a signal to your security system control which is connected to your monitoring centre in your phone, alerting you of the possible intrusion.

Our sensor is a passive infrared sensor that detects body heat. It can detect heat and movement in a protective grid.

Our PIR motion sensor is compatible with our Siren Hub.
